PROFESSSIONAL SUMMARY

Enterprise-grade **Agentic AI Systems Architect** with 10+ years designing multi-tenant SaaS platforms, governed multi-agent orchestration frameworks, and distributed AI systems across regulated industries. Expert in **architecture strategy**, **reference architectures**, **TOGAF-aligned capability mapping**, and **deterministic agentic workflows** that integrate cloud-native compute, intelligent data pipelines, and secure multi-agent execution.

Invited Speaker - Agentic AI For You Conference (2026)
Recognized for architecting real-world agentic AI systems with reliability, observability, and enterprise readiness.

ARCHITECTURE COMPETENCIES

- **Agentic AI Architecture** — multi-agent systems, orchestration, planning, and governance
- **Enterprise Architecture (TOGAF 10)** — capability modeling, ADM, and architecture governance
- **Solution Architecture** — SaaS, distributed systems, domain-driven design, and platform strategy
- **Data & AI Architecture** — RAG, vector databases, knowledge retrieval, and governance
- **Integration & Security Architecture** — Epic/FHIR, APIs, event-driven systems, compliance, trusted AI

CERTIFICIATIONS

Microsoft Certified | Agentic AI Business Solution Architect ***Jun 2026***

Johns Hopkins University | Certificate Program in Agentic AI ***Feb 2026***

Massachusetts Institute of Technology | Professional Certificate Program in AI & ML ***Jul 2025***

Massachusetts Institute of Technology | AI System Architecture & LLM Applications ***Jul 2025***

Massachusetts Institute of Technology | AI Strategies & Roadmap: System Engineering ***Mar 2025***

Microsoft | AI & ML Engineering Professional Certification ***Feb 2025***

TECHNICAL SKILLS

Agentic AI & ML: LangGraph, LangChain, OpenAI, CrewAI, SmolAgents, Scikit-learn, Spark, Azure ML

Programming: Python, Java, Kotlin, SQL, TypeScript, React, Node.js, FastAPI

Cloud Platforms: Azure, AWS, Vercel, Railway, Pivotal Cloud Foundry

DevOps & MLOps: Git, GitHub Actions, Docker, Jenkins, DVC, Redis

Platform Engineering & IaC: Azure DevOps, Terraform, Bicep, Helm, Kubernetes (AKS), CI/CD

ARCHITECTURE PROJECTS

Ambient Healthcare AI & Workflow Orchestration Platform

Architected an ambient healthcare AI platform utilizing autonomous agents, LangGraph, and MCP-based orchestration. Designed Epic interoperability through HL7 v2 integration to support intelligent workflow automation, clinical coordination, and scalable healthcare operations.

Agentic Case Studies — Multi-Agent Systems | https://www.mygreatlearning.com/eportfolio/darin-williams2

Designed multi-agent orchestration patterns using LangChain, LangGraph, Hugging Face, and vector databases. Established workflow governance, routing logic, and architecture patterns for enterprise AI systems.

Digital Twin AI Platform — Agentic AI, LangGraph, RAG | https://darindigitaltwin.com

Architected a multi-tenant agentic AI platform integrating LangGraph, RAG pipelines, and governed multi-agent workflows. Defined reference architecture, observability model, and deterministic agent behavior across distributed compute.

EMPLOYMENT HISTORY

Autonami AI LLC | Principal Agentic AI Architect (Founder-led Startup Experience) | Dallas, Tx

Aug 2025

- **Architected** an enterprise-grade, multi-tenant agentic AI platform for healthcare, defining the **reference architecture**, capability model, tenancy strategy, and governed multi-agent execution patterns.
- **Designed** modular multi-agent frameworks using Azure AI, LangGraph, and RAG pipelines, establishing **architecture standards**, policy-driven workflows, and deterministic agent behavior.
- **Defined** SaaS architecture strategy including tenancy model, pricing architecture, KPIs, pilot methodology, and compliance governance.
- **Established** architecture decision records (ADRs), platform roadmaps, and TOGAF-aligned architecture processes for commercialization.
- **Led** cross-functional architecture reviews across engineering, product, compliance, and clinical stakeholders to ensure alignment with enterprise goals.

BlueCross BlueShield of Texas | Senior Software Engineer | Richardson, Tx

Dec 2007 – May 2023

- **Architected** scalable microservice ecosystems using Java/Kotlin/Spring Boot, emphasizing reliability, security, and high-volume performance.
- **Designed** cloud-native deployment patterns and CI/CD pipelines using Jenkins and Pivotal Cloud Foundry.
- **Defined** service boundaries, integration patterns, and distributed system behaviors for enterprise applications.
- **Led** architecture reviews, mentored engineers on system design, and established secure coding standards.

EDUCATION

University of Tx Austin — Postgraduate Program in AI & ML (GPA 4.24)
2025

Regis University — Master of Science Software Engineering (GPA 3.8)
2015 – 2017

Western Governors University — Bachelor of Science Computer Science (GPA 3.6)
2012 – 2015
